ACADEMIC PROJECTS AND SEMINAR

1. SpoonBells (Food Pre-booking System)

Description: SpoonBells is a pre-food order Android Application. The Application provides online food ordering facility, specially developed for travellers. In this application, if a user is traveling from one city to another and he wishes to make a halt at some particular

restaurant for having food, the user can order the food online whenever he wants. So, when he reaches that particular restaurant, he directly gets to serve his food, without wasting the ordering and preparation time. The user can enter the approximate time of when he would be reaching there so that the restaurant can make food ready and serve him at that time.

Language: PHP, Android with Java, Javascript, JQuery, HTML, HTML5, CSS.

Database: MYSQL

Team Size: 5

2. Online Video Course Software.

Description: In this Project. Students can purchase the video course and access it for a lifetime. Students can ask the question on that panel and course mentor can help the student in solving their problems.

Language: PHP, Javascript, JQuery, HTML, HTML5, CSS.

Database: MYSQL

Team Size: 2
